## NEW BOOKS ADDED IN THE LIBRARY

### 1. Higher Education in India/Jandhyala B.G.Tilak

India has a large network of around 634 universities and 33,000 colleges with 817,000 teachers spread across the length and breadth of the country. Despite its massive geographical reach, **higher education in India** has had its share of problems. This volume is a collection of essays which discusses these problems like inclusiveness and the impact of reservation on education, the problems of mediocrity, shortage of funds, dwindling numbers of faculty and the unemployment of the educated youth, to name a few. Tracing the history of higher education in India from the days of Nalanda and Takshashila, Jandhyala B. G. Tilak in his introduction explains why it is necessary to have a vision and a roadmap for this.

## **2. Saving Capitalism from the Capitalists/Raghu Ram G Rajan and Luigi Zingale**

"Saving Capitalism from the Capitalists" is a groundbreaking book that will radically change our understanding of the capitalist system, particularly the role of financial markets. They are the catalyst for inspiring human ingenuity and spreading prosperity. The perception of many, especially in the wake of never-ending corporate scandals, is that financial markets are parasitic institutions that feed off the blood, sweat, and tears of the rest of us. The reality is far different. This book breaks free of traditional ideological arguments of the Right and Left and points to a new way of understanding and spreading the extraordinary wealth-generating capabilities of capitalism.

### **3. Self-Deception:India's China Policies origins,premises,lessons/Arun Shourie**

On what assumptions was Pandit Nehru confident that China would not invade India in 1962? Why and on what basis did he scotch all warnings in Tibet and our entire border? What did he do when those assumptions proved wrong? What eventually led to the debacle of 1962? Are the same delusions and mistakes not being repeated now? Why will the consequences be any different? This is a devastating analysis and warning on India's policy and approach regarding China, based on Nehru's notes to his officers, his correspondence, including letters to chief ministers and his speeches in and out of Parliament.

#### **4. Four Miles to Freedom: Escape from a Pakistani POW Camp/Faith Johnston**

When Flight Lieutenant Dilip Parulkar was shot down over Pakistan on 10 December 1971, he quickly turned that catastrophe into the greatest adventure of his life. On 13 August 1972, Parulkar, along with Malvinder Singh Grewal and Harish Sinhji, escaped from a POW camp in Rawalpindi. Four Miles to Freedom is their story. Based on interviews with eight Indian fighter pilots who helped prepare the escape and the two who escaped, as well as research into other sources, Four Miles is also the moving, sometimes amusing, account of how twelve fighter pilots from different ranks and backgrounds coped with deprivation, forced intimacy and the pervasive uncertainty of a year in captivity and how they came together to support Parulkar's courageous escape plan.

## **5. India's Foreign Policy: a Reader/Kanti P Bajpai and Harsh V Pant**

In this timely volume, two leading experts on India's foreign policy bring together essays written over the last 15 years by prominent scholars that challenge some of the commonly held perceptions about India's foreign policy. It explores and challenges several myths about Indian foreign policy- that it lacks strategic culture; there are no clearly discernible sets of principles; and it is largely idealistic in its orientation. The volume gives incisive insights into the key features of India's foreign policy. It also traces the changes that it has undergone over the years, and highlights contemporary policy challenges. In four sections, this volume analyses: India's thinking about its strategic culture and its conception of how to deal with the world; India's power and its foreign policy infrastructure; India's external relationships with major countries; and, finally, India's global diplomacy on issues of climate change and its approach to the WTO.

7. The Adventures of Robin Hood/Roger Lancelyn Green

The Adventures of Robin Hood by Roger Lancelyn Green is a brilliant the Robin Hood tales. All of the stories are here. Robin's fight with Little John is related, as is the archery contest, Robin's love affair with Marion, and the wedding of Allan-a-Dale. All of the characters like Friar Tuck, Will Scarlet, Little John, Maid Marion, and (guess what!) Robin Hood make their appearances. Overall, the tales are well told, and the book is very complete. My favorite portion of this edition is the prologue in which the author writes from where the stories are derived. There, I was turned to Thomas Love Peacock's brilliant, if forgotten; tales of Robin Hood entitled Maid Marian. This edition will help to keep the adventures of Robin Hood in the minds of children for another generation.

## **8. Understanding Organizational Behaviour/Udai Pareek**

The third edition of this well-accepted book continues to balance theory and application. The book has provided coverage to individual, group and organizational aspect of OB. Readers would find it useful for the diverse areas covered. Human behaviour in the times of change has been its focus in relevant sections. This edition includes one new chapter on the foundations of individual behaviour. All the chapters have been revised and updated to include more organizational examples. The revised edition includes new sections on employee retention, employee productivity, talent management, quality, FIRO-B, transactional analysis (TA), reinforcement and modification of managerial behaviour, and theory X and Y. Group behaviour has been given a renewed focus by the inclusion of sections on types and development of groups, group norms, and decentralization. Additional figures and tables have been included to facilitate better understanding of the theory. Self-assessment tests (STA) have been included within the chapters in this edition

## 9. An Agenda for India's Growth/Sameer Kochhar

Since 1991, P. Chidambaram has been deeply involved with the economic reforms that have changed India for the better. He firmly believes that economic freedom is linked not just to higher growth, more jobs and larger incomes, but has undeniable connections to political freedom, empowerment, transparency and good governance. This book is as much a tribute to Chidambaram's eloquent advocacy of economic freedom and the courage he displayed in implementing it as about setting the agenda for the country's next wave of reforms. The authors of the essays in this volume are accomplished experts in their respective spheres. Together, they cover a wide range of issues: fiscal and monetary policies, strengthening financial inclusion, revitalizing agriculture, buoying stock markets, policy on natural resources, external trade reforms, urban infrastructure renewal and security aspects to growth..

## 11. Marx's Capital/Ben Fine & Alfredo Saad-Filho

This brilliantly concise book is a classic introduction to Marx's key work, Capital. In print now for over a quarter of a century, and previously translated into many languages, the new edition has been fully revised and updated, making it an ideal modern introduction to one of the most important texts in political economy. The authors cover all central aspects of Marx's economics. They explain the structure of Marx's analysis and the meaning of the key categories in Capital, showing the internal coherence of Marx's approach. Marx's method and terminology are explored in detail, with supporting examples. Short chapters enable the meaning and significance of Marx's main concepts to be grasped rapidly, making it a practical text for all students of social science. Discussing Capital's relevance today, the authors consider Marx's impact on economics, philosophy, history, politics and other social sciences.
